- Made in the UK
- Cut-outs already in place to allow for pipe entry and exit (relevant boxes only)

Recommended tools

- Marker pen
- Drill & drill bit to suit screws
- Suitable screw driver
- Spirit level
- 6 x self-tapping screws (4mm x 13mm)
- External silicone

Installation Instructions

Installation should be carried out by a competent person

1. Remove the old lid if it is still present.
2. Remove all packaging from the new.
3. Open the lid with the key.
4. Offer the new unit up (it should slide over the top of the existing frame).
5. Screw through the back or side of the unit depending on access and any interference within the meter box itself.
6. The new meter cover should fasten to the existing frame which is already in place.
7. Close the lid and secure lock.

Once installation is complete please dispose of all rubbish in an environmentally friendly way.

Approximate dimensions: DKM manufacture all of their own products; dimensions are subject to DKM Sheet Metal's commercial tolerance* Remember electricity and gas can kill please ensure that you are able to safely carry out the installation. If for any reason you decide that the installation carries a risk DO NOT proceed and contact your utility company on their emergency call out number.
